

DESIGN SPECIFICATIONS

High quality,reliable,long life and complete power unit.
vicompact design.
Easy start and maintenance possibility.
Vievery generating set is subject to a comprehensive test programme which includes full load testing and checking and proving of all control and safety shut down functions testing.
Vieuly engineered with a wide range of options and accessories: Electrical, mechanical, soundproof canopy and mobile units

(DP.R.P. Prime Power - ISO 8528:PRIME POWER is the maximum power available during a variable power sequence, which may be run for an unlimited number of hours per year, between stated maintenance intervals. The permissible average power output during a 24 hours period shall not exceed 80% of the prime power. 10% overload available for governing purposes only.

@Max Standby power -ISO 3046 Fuel Stop power.Power available for use at variable loads for limited annual time (500h), within the following limits of maximum operating time: 100% load 25h per year ,90% load 20h per year. No overload available. Applicable in case of failure of the main in areas of reliable electrical network.

It has a digital LCD screen, which provides easy reading of the information regarding the Engine, Alterator, Mains and Charging. The controller meets all requirements for Auto Mains Failure (AMF) applications including remote communication and internet control, user configuration and complete genset monitoring and protection.

READINGS that can be made:	•Protection of the engine and alternator, with the ALARMS activated:	•Other characteristics:		
Engine:cooling temperature/oil pressure/revolution speed (rpm)/fuel level/b attery voltage/battery alternator voltage/operating hours/number of start	Engine: low oil pressure/high coolant temperature/low and high battery Volta	Event log, real-time clock, scheduled start & stop generator (can be set as start genset once a day/week/month whether with load or not). Maximum 99 event logs can be mernorized.		
<u>Alterator :</u> voltages between phases and between phases and neutral/frequ ency/phase sequence		With maintenance function. Types (date or running time) can be optional and actions (never, warning, or shutdown) can be set when maintenance time out.		
Mains: frequency/voltages between phases and between phases and neutr al (L1-N, L2-N,L3-N)/voltages between phases and (L1-L2, L2-L3, L1-L3)/phase sequence	Mains: over and under voltage and loss of phase	Equipped with CANBUS port and can communicate with J1939 enginet. Not only can monitor frequently-used data (such as water temperature, oil pressure, speed, fuel consumption and so on) of ECU machine, but also control starting up, shutdown, raising speed and speed droop via CANBUS port		
Load: Current(Ia,Ib,Ic)and each phase and total active power(kw)/reactive power(kvar)/apparent power(kva)/power factor/accumulated generator pow er(kwh,kvah,kvah)/output percentage with load (%)	•Control of the set:	RS485 communication interface enables "Three remote" functions (remote control, remote measuring and remote communication) according to MODBUS protocol.		
	ed and when it is restored, respectively. It can also operate MANUALLY and A uto Transfer Switch control	Parameter setting: parameters can be modified and stored in internal FLASH memor y and cannot be lost even in case of power outage; most of them can be adjusted using front panel of the controller and also can be modified using PC via USB or R5485 port.

Dimensions(Open Skid Type) With Standard Fuel Tank

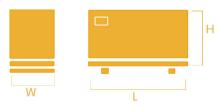

√The complete gen-set is mounted on whole on a heavy-duty fabricated,steel base frame \checkmark Antivibration pads are fixed between the engine/ alternator feet and the base frame ; \checkmark Base frame design incorporates an integral fuel tank.

 $\sqrt{}$ The generating set can be lifted or carefully pushed / pulled by the base frame;

 $\sqrt{\text{Dial}}$ type fuel gauge and drain plug on the fuel tank; $\sqrt{\text{Forklift pockets within base frame (up to 500kVA);}}$

Dimensions(Silent Type) With Standard Fuel Tank

 ${}^{\surd}\!\text{All}$ canopy parts are designed with modular principles. ${}^{\checkmark}\!$ Without welding assembly

 \checkmark All metal canopy parts are painted by electrostatic polyester powder paint. √Doors on each side

√Thermally insulated engine exhaust system.

√Emergency stop push button outside of canopy. √Easy maintenance and operation.
