

#### **DESIGN SPECIFICATIONS**

√High quality,reliable,long life and complete power unit.
 √compact design.
 √Easy start and maintenance possibility.
 ∨Every generating set is subject to a comprehensive test programme which includes full load testing and checking and proving of all control and safety shut down functions testing.
 √Fully engineered with a wide range of options and accessories:Electrical,mechanical, soundproof canopy and mobile units

(I) P.R.P. Prime Power - ISO 8528:PRIME POWER is the maximum power available during a variable power sequence, which may be run for an unlimited number of hours per year, between stated maintenance intervals. The permissible average power output during a 24 hours period shall not exceed 80% of the prime power. 10% overload available for governing purposes only.

@Max Standby power -ISO 3046 Fuel Stop power, Power available for use at variable loads for limited annual time (500h), within the following limits of maximum operating time: 100% load 25h per year, 90% load 200h per year. No overload available. Applicable in case of failure of the main in areas of reliable electrical network.
